

## BHV Fills Some Zone ... Xtra-Gold Reports

Plus: More Shock Rock ... and New Orleans

Thursday, July 15, 2010

By Thom Calandra -- [TickerTrax.com](http://TickerTrax.com)

**Briefs: Belhaven Copper & Gold** ([TSX: V.BHV](http://TSX:V.BHV), [Stock Forum](http://Stock Forum)) says channel sampling at La Cantera, Bellhaven's porphyry gold prospect at La Mina in Colombia, yielded two series of channel samples containing considerable (*my description*) gold. The first sampled exposure contained 1.09 g/t Au over 22 m. Says interim CEO and geologist Dr. Paul Zweng: "The big picture is that La Mina has a lot of gold on the surface. (But) I am holding off on Champagne until we deliver good drill results." For more: [Please see report](#). Dr. Zweng will be back in Colombia in about one week.
