

# VERAGUAS GOLD BELT

**BELLHAVEN**  
COPPER & GOLD INC.

COSTA RICA

PANAMA

Bellhaven has two prospective blocks in the Veraguas Gold Belt, site of two past producing gold mines and host to numerous epithermal gold prospects. Bellhaven's highly prospective Los Hatillos concession covers Los Hatillos/ Aguacatal and Boca de Higuí blocks comprising 4.9 km<sup>2</sup>.

## LOS HATILLOS AGUACATAL

Mineralization at Los Hatillos – Aguacatal occurs in a series of epithermal, crustiform-banded, quartz veins. Bellhaven has identified a total of six mineralized veins that have a combined strike length of 8 km.

Previous drilling on the Los Hatillos concession has encountered significant high-grade gold mineralization (17.06 g/t over 10.7 m)

## BOCA DE HIGUI

Gold mineralization at Boca de Higuí occurs in a swarm of steeply-dipping, crustiform-banded, quartz veins and breccias. Surface samples collected during the 1980's returned strongly anomalous gold (up to 15 g/t).

Outcrop at Rio Higuí

Follow-up sampling in the early 1990's confirmed the presence of anomalous gold in both the veins and the wall rock. Seven diamond drill holes were completed in 1994. Five of the holes intercepted gold mineralization. The best intercept was 1.5 m of 6.41 g/t Au. Boca de Higuí is located just 7 km west of the Remance mine and 12 km east of the Santa Rosa mine, both former producers. Santa Rosa produced 105,000 ounces of gold

## Exploration Program 2007-2008

During 2007 and 2008 Golden Cross completed and a geophysical program IP survey over targets at the Los Hatillos/Aguacatal and Boca de Higuí Blocks. Work completed included semi-regional gridding and subsequent geophysics programmes (IP-VLF-EM and ground magnetics). Drilling during 2008 completed 8 holes for 1,033 meters, 4 holes at the Veta Blanca target and 4 holes at El Tiro target. The best result of the drill program were;

LHD-02 9m 1.31 g/t

LHD-03 4m 3.23 g/t

LHD-04 4m 1.27 g/t

LHD-05 9m 1.49 g/t

LHD-06 5m 3.75 g/t

LHD-07 6m 1.06 g/t

The Boca de Higuí block was not drilled. Golden Cross terminated the agreement on September 2008.
